---

Hello Garrett,

It was nice talking with you. Please find below the interview details:

**Date:** 27-Jan-2021

**Time:** 5:00 pm CST

**Interviewer:**

John Bickar(Hiring Manager)

**Note:** You will receive an email from John with more details

**Job Description:**

We're looking for candidates with expertise in:

Component-oriented development using React/Gatsby or equivalent.

Mobile-first and responsive design principles using front-end frameworks that rely on ES6/9.

Able to balance progressive enhancement and graceful degradation approaches.

WCAG 2.0 AA web accessibility standards, including the use of semantic HTML and ARIA.

API integrations.

Understanding of static site generation build processes

Familiarity with AWS LAMBDA Functions and microservice architecture

Familiarity with Netlify or equivalent serverless architecture

Experience working with REST APIs, JSON and GraphQL

Working with Git and feature/branch workflows and continuous delivery.

Other abilities include:

Ability to work well under pressure with multiple projects in a highly collaborative environment.

Ability to interact positively with and build consensus among a diverse group of colleagues, clients, and senior leadership.

Solid understanding of web standards and usability methods.

Familiarity with browser devices and platform differences and idiosyncrasies, and ability to develop workarounds to accommodate specialized user/client needs and device platforms.

Experience working with build tools and package managers, such as Yarn, Webpack, or

similar.

Thanks & Regards,
